

Pro5 firmwares & configurators

Important!

You may need to download the [Microsoft .NET Framework](#) to use the Device Center.

Important!

If you are using Bluetooth functionalities, use the Release pack or Device Center automatic updates to update your firmware. This way the Bluetooth module firmware will be updated as well (required for Bluetooth functionalities).

Firmware file	Release pack	Device Center	Change log
Pro5_00.06.07.41.efwp5	ReleasePack_2020-12-18.fwp	DeviceCenter.zip	change_log.pdf

Note: Firmware downgrade below version 00.06.07.41 will not be possible for Pro5 devices due to new device hardware support.

Backup instructions:

In case of a device malfunction after the firmware update, please downgrade it to the previous stable version.

Notes:

Device firmware update will delete all unsent records.
Do not use older configurator for new devices with this firmware.
