

# Device Center

Introducing the new configurator for Ruptela GPS trackers – Device Center. Download the Device Center application and try out a better way to configure and set up our GPS trackers.

The Device Center is the primary tool to configure all Ruptela GPS trackers. The old configurator version is also available via the Device Center application.

**Important!**

You may need to download the [Microsoft .NET Framework](#) to use the Device Center.

**Important!**

The Device Center supports only **Windows 7/8/10** operating systems.
